

# inteGIRLS Puzzle Hunt 2020 Hints

<b>Compound Interest</b>	Instead of compound interest, try thinking about compound words. Treat each line as a compound word!
<b>Contagion</b>	The two red cities that are not infected are Bangkok and Beijing. What is it about the names of those cities that would cause them not to be infected? The key is to figure out how the virus spreads.
<b>Don't Think Outside The Box</b>	Read the flavor text as instructions to the first step of the puzzle.
<b>Four-rest</b>	When in doubt, sound it out.
<b>Frogmented</b>	Look at the letters the tongues pass through.
<b>Galaxy Positioning System</b>	The arrival time can help you find the specific one-word answer.
<b>Grocery Shopping</b>	What do the ingredients make?
<b>He Loves Me, He Loves Me Not</b>	Try playing the "he loves me, he loves me not" game on each of the petals.
<b>Hidden Figures</b>	There's a connection between the colored letters and the answers to their clues. Try highlighting it.
<b>Interview with an Electron</b>	Check the description of the Wu experiment again. What in the description of the experiment would cause the electrons to choose one answer over another?
<b>Jumping Gene</b>	Once you're done with step one, try joining the differently-colored segments together. The theme of the puzzle is particularly important for this one.
<b>Locations United</b>	Try walking around the carpet. How does your position affect the location?
<b>Lost &amp; Found</b>	Name of the discoverer and date of discovery are the most important factors.
<b>Monopoly: inteGIRLS Edition</b>	<a href="https://images-na.ssl-images-amazon.com/images//81btrHKgO0L._AC_SL1500_.jpg">https://images-na.ssl-images-amazon.com/images//81btrHKgO0L._AC_SL1500_.jpg</a>
<b>Prima</b>	Each image is a numbered position in ballet, try looking them up.

<b>Rainbow</b>	Each of the names (plus emojis) represent a four-digit year. Notice that each half of the (FOUR-DIGIT) numbers you get from the arithmetical operations is no greater than 26.
<b>Similar Similes</b>	All of the lines contain commonly-used similes, except something is replaced with a synonym that's slightly wrong. What did I change it from?
<b>Star Sailor</b>	How do maritime ships communicate with each other?
<b>The User's Handbook To Mathematics</b>	All of these represent math theorems. Maybe this will help: <a href="http://pirate.shu.edu/~kahlnath/Top100.html">http://pirate.shu.edu/~kahlnath/Top100.html</a>
<b>Think Fast</b>	Look closely at the flavor text! How can we add what we're given to the names of our twelve cranial nerves?
<b>Variables</b>	The La Luna clue is pointing to ladders, specifically word ladders! Word ladders are pretty popular on Sporcle.
